

Office of Information and Regulatory Affairs (OIRA) Tracker for Nuclear Regulatory Commission Rulemaking

Last Update: **September 1, 2026**

All data is populated from [reginfo.gov](https://www.reginfo.gov)

OIRA is under the Office of Management Budget which is part of the Executive Office of the President. Historically, OIRA has not reviewed independent agency's rulemakings. Executive order, "[Ensuring Accountability for All Agencies](#)" (EO 14215), issued on February 24th, 2025, now requires all independent safety agencies to undergo an OIRA review. NRC must now submit its rulemaking and guidance for a significance determination. If determined to be significant, a proposed rule would go through the EO 12866 OIRA review process that has governed all traditional cabinet departments and agencies since 1993. The purpose of this tracker is to provide insight into the impact of the OIRA process on the rulemaking timeline. From this data, OIRA averages a 70-day review period on NRC rulemaking. Following the conclusion of the OIRA review, NRC releases the proposed rulemaking for public comment periods, which average 30 days, with some rulemaking given a 45-day comment period. Once public comment ends, the agency must address the comments before OIRA reviews the rule a final time. For a full view of NRC rulemaking see NIA's [Expected NRC Executive Order 14300 Rulemaking Timeline](#).
